

Oasis V Series

Fully Variable Speed Pump

Reduce your electricity
and running costs.

- ✓ **Reduce electricity costs and save \$\$\$**
Using a variable speed motor, the pump can run using less power and only ramps up when required
- ✓ **Whisper quiet**
The latest technology means this pump is 50% quieter than a standard pump
- ✓ **Reduces carbon emissions**
Running the pump more efficiently and using less power has the potential to save up to 70% on carbon emissions

Part of the  sunlover group

The Oasis V Series Pumps are up to 70% more efficient than a regular pump, reducing your carbon footprint and saving you money.

Conventional single speed pumps are working at their maximum capacity all the time. The Oasis V Series has a variable 3 speed DC motor, allowing it to use less power during less intense functions like filtration and ramp up when it's needed most. This is ideal for systems that have spa jets and in-floor cleaning that require occasional high intense power.

Our latest technology has created an incredibly quiet motor operating @50dBA*.

Changing the flow rate means the pump isn't working at full capacity all the time, giving these pumps a long life backed by a 3 year limited warranty.

Benefits

- > Reduce your electricity costs by up to 70% p/a
- > Highly adjustable flow rates
- > Whisper quiet
- > Ideal for high flow applications such as spa jets and where in-floor cleaners are used
- > Australian Made
