

# HOW COMPASS CAN OFFER YOU A BETTER LOOKING POOL

## OUR EXCLUSIVE BI-LUMINITE™ LAYERING PROCESS CREATES A 3D EFFECT WHICH ENHANCES YOUR POOL WATER COLOUR

The surface of a Compass Bi-luminite pool can only be described as brilliantly luminous. The technology behind this three-dimensional lustre is another example of the scientific approach Compass takes to every aspect of pool construction.

Before Compass developed Bi-luminite, most fibreglass pools came in plain colour finishes. Some had flecks, others tried to look like marble. Compass revolutionised the look of composite pools by inserting large reflective chips into the resin and using two colour layers, not just one.

### BI-LUMINITE™ CERAMIC RANGE

A multi-layer colour system combined with large reflective chips creates a 3D effect for water colours of unmatched depth and luminosity. Create a powerful and impressive statement of style and colour in your backyard. All Compass Bi-luminite pools come with Armourshield - an additional vinyl-ester resin layer for greater structural and cosmetic protection.

To celebrate our partnership with the **McGrath Foundation** we have added a touch of pink to one of our most popular colours.

### VIVID CERAMIC RANGE

A unique combination of pigmented gelcoat, glitter and Compass' exclusive large reflective chips, the Vivid range creates a contemporary granite-effect finish.

ARCTIC MARINE

ICE BLUE

GREY MARBLE

ROYAL BLUE

Vivid ceramic pools have different warranty terms to Bi-luminite pools. Refer to the Compass Pools Australia manufacturer's warranty. Colour samples are a guide only. These colours are a digital representation and final colour may vary depending on the pool surroundings and the unique manufacturing process.

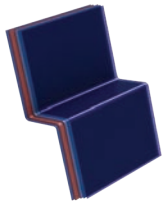

## A World-Leading Product

### Vantage self-cleaning and circulation technology

Enjoy the best pool ownership experience with a hands-free pool that costs less to run.

### Ceramic Core technology

A pool with unrivalled strength and osmosis resistance that can be backed by a lifetime structural and osmosis warranty\*.

### Stunning Bi-luminite colour technology

A unique dual-layer colour system for unmatched depth, luminosity, and better colour protection.

### Above ground installation systems

Install a Compass Pool almost anywhere, from hillsides to rooftops and even rocky sites.

### World-exclusive hydrostatic damage protection system

The only fibreglass pool manufacturer in the world to offer a lifetime warranty against hydrostatic damage\*.

### EXCLUSIVE WARRANTY

### Triple warranty protection

The most transparent, honest and simple warranty with three layers of protection; structural, cosmetic, and hydrostatic\*.

### Site specific solutions

The only brand to have pool shells specifically designed for highly reactive and extremely reactive soil conditions.

### Customisable design options

Offer custom design solutions such as vanishing edges, acrylic panels, beach zones, and pool & spa combos.

### We give back

We have donated over \$1,000,000 to McGrath Foundation and have pledged to continue our support.

4.1 Plunge Combo	4.1m	2.15m	1.2m	0.8m	4,950L

ENJOY THE LIFESTYLE YOU IMAGINED WITH A SELF-CLEANING POOL.

Most people who buy a pool start with dreams of relaxing and enjoying time with family and friends. What they don't picture is the hard work which is typically needed to look after that pool – all the manual cleaning, the heavy lifting of robot or suction cleaners, and the ongoing task to keep your water balanced, healthy and safe to swim in.

Our exclusive in-floor cleaning and circulation system (which is exclusive to Compass Pools) can help you say goodbye to jobs and hello to resort-style living at home. This operating system virtually eliminates the need for manual cleaning and helps to reduce your running and heating costs at the same time. With enhanced circulation your pool water will remain healthier, safer, and ready to swim in when you are!
